

Performance Sail Tuning at your fingertips!

The Blokart Ultra Downhaul 2 will easily retrofit to any Blokart for those wanting greater control of their downhaul when sailing.

The triple blocks allow for the maximum number of purchases permitted under the Blokart 1-Design Racing Rules for the Performance Division as set by IBRA.

This allows easier control over the sail shape and mast bend when using carbon mast sections.

Features

- Built-in centrally located cam cleat for easy access while sailing
- Swivelling snap shackle eyelet buckle for quick sail changes
- High quality marine grade stainless steel components

Blokart Mast Crane

For best results, use the
Blokart Ultra Downhaul 2 in
combination with the
Blokart Mast Crane which
allows your sail to pivot
freely and smoothly even
with massive downhaul
